

Filter paper

Technical Sheet

CN-544

The CN-544 line possesses characteristics similar to the CN-542 but with higher filtration rate.

● Filtration speed	55 sec (DIN 53-137)
● Ash content	0,01%
● Weight	85g/m ³
● Thickness	0,2mm
● Average retention capacity	4 - 7µm

- **Uses:** Quantitative analysis in general, especially in gravimetric determinations precipitated as barium sulfate (hot), barium chromate or calcium oxalate. It is recommended as an alternative paper application to S&S 589/5 (red band), Whatman 44 or Macherey-Nagel 640md.
